

Press Release April 2024

E³UDRES² Ent-r-e-novators project meets EC milestones in first evaluation period

Review meeting

The E³UDRES² Ent-r-e-novators project has reached a commendable milestone following its comprehensive evaluation by the European Commission. Covering the first 15 months of its operation, the review meeting held on March 22nd has concluded with results that signify the project's excellent progress and its strict adherence to the Grant Agreement.

The meeting, a convergence of the Project Officer, the Commission's appointed Reviewer, the Project Coordinator, all work package leaders, and representatives from the partner institutions, marked the culmination of the evaluation process. The assessment's outcome, released on April 3rd, underscores the project's achievements, indicating that all objectives are on track to be accomplished without foreseeable hindrances.

The E³UDRES² Ent-r-e-novators project has the active participation of the 6 original partners of the E³UDRES² alliance. These include:

- Hungarian University of Agriculture and Life Sciences
- Polytechnic of Setúbal (Portugal)
- Politehnica University Timisoara (Romania)

- St. Pölten University of Applied Sciences (Austria)
- UC Leuven-Limburg UAS (Belgium)
- Vidzeme University of Applied Sciences (Latvia)

Professor Luís Coelho from the Polytechnic of Setúbal, the Project Coordinator, reflected on the evaluation: "The positive assessment from the European Commission is a testament to the diligent and outstanding performance of our entire team. All thirteen deliverables submitted in this initial phase were accepted without any modification, which speaks to our commitment and strategic execution. This excellent result has invigorated us, and we are more motivated than ever to continue on this trajectory of success throughout the remainder of the project."

The E³UDRES² Ent-r-e-novators project has demonstrated exemplary management and operational excellence. The European Commission's acknowledgment of the project's high-quality results and effective management is a clear indicator of the value and impact of collaborative European projects.

As the project moves forward, the team remains dedicated to fulfilling the project's global objectives and contributing meaningfully to the European research and innovation landscape.

The E³UDRES² Alliance, aimed at fostering smart and sustainable regions within Europe, is comprised of a network of higher education institutions. The E³UDRES² Ent-r-e-novators project is committed to scientific excellence and research integrity within its cross-disciplinary and cross-sectoral key R&I networks and promotes (future) services and management for collaborative research and open innovation for smart and sustainable regions.

The project is funded by the European Commission under the Horizon Europe program (Project No 101071317). For more information about the E³UDRES² Ent-r-e-novators project visit <https://www.entrenovators.eu/>.
